

# Bring out the child in you; Explore 3D PRINTING

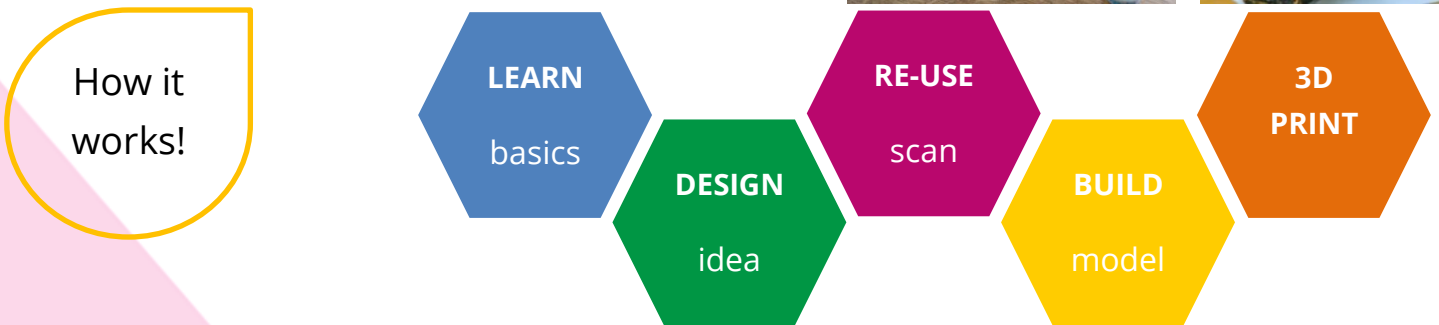

3D Printing is a disruptive new technology with which you can design and print personalized 3D objects in various sizes, materials and colors.

We offer an exclusive and innovative opportunity to immerse into the fascinating world of 3D printing and gift yourself a life-time skill and creative fulfilment.

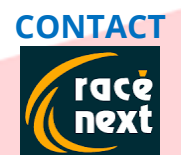

Curated and supervised by industry experts, this Fun+Do+Learn program works well in corporate team building events and in International schools.

- Discover how 3D printing has revolutionized manufacturing, education, aviation, jewellery, dentistry, surgery, architecture etc.
- Decode the jargon: slicing, infill, overhang etc.
- Model your own 3D object using CAD software
- Watch 3D printing in action
- See a variety of 3D prints on display each day
- Take away your very own 3D selfie figurine
- 3D Print the model you created
- Experience the joy of *doodle* art with 3d pens
- Flaunt a well-deserved Completion Certificate
